

Parsing and Normalisation Report

Readable SOC analyst summary generated from the selected agent output.

Ticket ID	TKT-CACHE-0001
Incident ID	TKT-CACHE-0001
Alert ID	ALERT-CACHE-V1
Severity	High
Confidence	High
Generated At	2026-06-18T15:08:34.015859+00:00

Parsing and Normalisation Report

LLM Parser Executive Summary: The parser completed with status completed and selected alert ALERT-CACHE-V1. It extracted SOC-ready fields for downstream triage.

1. Document Control

Field	Value
Ticket ID	TKT-CACHE-0001
Incident ID	TKT-CACHE-0001
Alert ID	ALERT-CACHE-V1
Stage	Parsing and Normalisation
Stage Status	Not Provided
Report Export Mode	Word/PDF generated on demand
Generated At	2026-06-18T15:08:34.000790+00:00

2. Parser Metadata

Field	Value
Parser Status	completed
Parser Confidence	High
Parser Confidence Score	95

Normalised Alert Count	1
Output Handoff	processed_alert.json is used for the Triage Agent

3. Selected Alert Summary

Field	Value
Alert ID	ALERT-CACHE-V1
Incident ID	TKT-CACHE-0001
Alert Name	Export Cache Parser Test
Alert Time	2026-06-18T10:00:00Z
Severity	High
Risk Score	82
Hosts	wkstn-cache-001
Users	alice

4. Normalised SOC Fields

Field	Extracted Value
Source IPs	10.0.0.5
Destination IPs	8.8.8.8
Internal IPs	Not Provided
External IPs	Not Provided
Source Ports	Not Provided
Destination Ports	Not Provided
Services	Not Provided
Emails	Not Provided
File Names	Not Provided
File Hashes	44d88612fea8a8f36de82e1278abb02f
Process Names	powershell.exe
MITRE Technique IDs	Not Provided

5. LLM Normalisation Quality Assessment

Parser confidence is High with score 95. No major missing parser fields were recorded.

6. LLM Analyst Interpretation

Severity is High. Hosts: wkstn-cache-001. File hashes: 44d88612fea8a8f36de82e1278abb02f.

7. Parser Quality and Missing Fields

No important parser fields were recorded as missing.

8. Parser Warnings

No parser warnings were recorded.

9. Downstream Handoff to Triage Agent

Parser JSON output is ready for the Triage Agent once processed_alert.json has been written.

Use processed_alert.json as the source-of-truth input for the Triage Agent. Do not rely on PDF/Word exports for machine handoff.

10. Output File References

Output	Status
processed_alert.json	Machine-readable handoff to Triage
soc_context_normalised_alert.json	Clean normalised SOC context
soc_context_parser_summary.json	Parser confidence and missing-field summary
Word Export	Generated only when Download Word is clicked
PDF Export	Generated only when Download PDF is clicked

11. Analyst Review Notes

Field	Analyst Update
Parser Output Accepted	
Important Fields Validated	
Missing Fields Accepted
